Computhink Announces ViewWise Document Management Integration with CAPSYS CAPTURE Software

Chicago, IL, August 7, 2012 – Computhink, Inc., a leading developer of electronic content management solutions targeting the small to medium-sized market, is pleased to announce a direct integration with CAPSYS® Technologies, LLC's CAPSYS CAPTURE™ Document Scanning Capture Software.

The web-based CAPSYS software streamlines the process of scanning, indexing and routing documents and information securely and efficiently, from any location, using only a web browser, helping companies reduce operational costs and increase productivity. With no workstation software to be installed, upgraded or maintained, the CAPSYS CAPTURE solution delivers rapid ROI compared with traditional capture software. It is available as an "on-premise" deployment, subscription based "on-demand" or SaaS service; or as a pre-configured network appliance.

Computhink's ViewWise® Document Management Solution integrates into a company's existing infrastructure, supplying the missing piece of the puzzle for secure information sharing and compliance. By integrating CAPSYS CAPTURE with the ViewWise Document Management Solution, users have a convenient method of digitally capturing and automatically indexing paper documents into a secure document management environment.

"It's a fact, small to medium-sized business owners must run operations efficiently in order to remain competitive and survive during these tough economic times. Affordable content management software solutions like ViewWise provide a means to this end." said John Stelmach, President, Computhink, Inc. "The integration of ViewWise document management solutions with CAPSYS CAPTURE software now provides a complete solution with even a greater Return-On-Investment."

CAPSYS CAPTURE Cloud or On-Premise offerings simplify the process of acquiring data and documents from electronic and physical documents (via scanners, email, fax systems or emerging e-tablet technologies) and gathers this information securely and efficiently. This data can be automatically stored into the ViewWise Document Management Solution, where the business process is automated, and the user can rest-assure they are complying with industry regulations while increasing employee efficiency and reducing or even eliminating the costs of physical paper and storage space.

"Computhink's ViewWise platform is a formidable ECM solution for small to midmarket organizations," said Paul Szemplinski, President of CAPSYS Technologies. "With CAPSYS CAPTURE software, ViewWise partners and customers now have easy access to rich production capture capabilities previously only available in thick-client software systems. Plus, they have a choice in how to deploy the software. CAPSYS CAPTURE ONLINE lets companies realize the benefits of Cloud computing – a new option for meeting data and document capture needs – and provides a simple way to get started with a Cloud service that fully integrates with their existing ViewWise Document Management system."
