

Finally, a Complete Document Capture Solution Designed Exclusively with the Needs of the Line of Business Owner in Mind

INTRODUCING CAPSYS AXIOM™—a fully functional, single or multi-user, web-based document and data capture solution available in the convenience of a network appliance. All you have to do is take the appliance out of the box, plug it in to your network and start scanning. It's that easy and it's that convenient.

Don't let its small size fool you. With CAPSYS AXIOM, we have eliminated the implementation challenges to make the process of acquiring documents and information for your business quick and simple. You no longer have to deal with complicated hardware and software installation and configuration requiring countless hours of support and planning from IT staff. With CAPSYS AXIOM, you can start achieving your desired business timelines and objectives in record time.

Everything you need to begin capturing your organization's vital business documents is pre-installed on CAPSYS AXIOM and ready to go: CAPSYS Web-based Document and Data Capture Software, Microsoft® Windows Operating System, Microsoft SQL Server Express, and Backup Software. When the CAPSYS AXIOM Network Appliance arrives at your facility, your Authorized CAPSYS Business Partner will help you fine tune your individual document and data capture application needs—personalizing the configuration, so you will be able to automatically upload the documents

and viable information captured with the CAPSYS AXIOM network appliance to your preferred Enterprise Content Management System.

With CAPSYS AXIOM, we drive the complexity and high cost of ownership out of the document capture solution. Now, you can finally focus on solving complex business problems—all while simultaneously achieving organizational productivity, operational efficiency and corporate compliance.

Small Form Factor, Superbly Packed with Features, Functionality and Simplicity

Simply plug the CAPSYS AXIOM™ network appliance into your corporate network and begin realizing the benefits of your own fully-featured, document capture solution. The CAPSYS AXIOM single or multi-user Document Capture Network Appliance includes batch scanning, document indexing, workflow process and data automation capabilities.

Every CAPSYS AXIOM Network Appliance ships with:

- ▲ Pre-installed software—CAPSYS CAPTURE Software, Windows 7 Operating System, SQL Server Express, and Backup software
- ▲ Ability to connect to your corporate network using an industry-standard Ethernet cable
- ▲ Flexible Configuration Options: Single User and 5 Concurrent Capture User Versions
- ▲ No volume restrictions, no page click charges
- ▲ Anti-virus software
- ▲ Automatic scheduled backups

ABOUT CAPSYS

CAPSYS™ is a leading provider of document and data capture software solutions designed to streamline the process of acquiring documents and information securely and efficiently. CAPSYS provides its affordable, easy-to-deploy, web-based document capture solutions via a thin client application requiring no client software to be installed, upgraded or maintained. The company's flagship product, CAPSYS CAPTURE Software, can easily and efficiently capture documents for organizations of any size, from anywhere, at any time, in both centralized and distributed document capture environments. CAPSYS' solutions are offered both as a Software as a Service ("SaaS"), hosted in the convenience of our secure data center, as a traditional "on-premise" license purchase or as an easy-to-deploy, pre-configured network appliance. To learn more, call 877-322-7797 or visit www.capsystech.com.
